Projects financed by Agency of MA SK for structural funds of EU

operational programme Research and Development

MLIEKO (MILK) – Improvement of milk recovery effectiveness in cows and ewes in connection with milk quality, udder health and animal welfare

Coordinator: Assoc.Prof.Ing. Vladimír Tančin, DSc.

The objective of this project is improvement of cow and ewe breeding management and increase in competitiveness of good quality milk production with the emphasis on consumer, udder health and animal welfare.

PROBIO – Probiotic microorganisms and bioactive matters of natural origin for healthier population in Slovakia

Principal investigator for APRC Nitra: MVDr. Soňa Nitrayová, PhD.

The objective of this project is research and acquisition of further knowledge to improve the prevention and therapy of chronic and infectious diseases with the aim to improve state of health in inhabitants. The objective for APRC Nitra is to determine the influence of probiotics, polyunsaturated fatty acids and plants on selected chemical, microbiological, enzymatic and metabolic parameters in blood, chime, faeces of pigs, and on their morphological structure of intestine.

ZDRAVIE (HEALTH) – Healthy nutrition for healthy vital functions

Principal investigator for APRC Nitra: MVDr. Sona Nitrayova, PhD.

The research workplace cooperates with an enterprise in applied research aimed at improvement of health and life quality in inhabitants. The objective of this project is to develop new products by application of biologically active matters.
