Biotechnology and Animal Food Quality

11203-1644/Nitra02

Part III

Biotechnology and Animal Food Quality

Slovak University of Agriculture, Nitra

Animal Production Research Centre Nitra

Peter Chrenek et al.

Nitra 2013

COORDINATOR: Slovak University of Agriculture, Faculty of biotechnology and Food Science, Nitra, Animal Production Research Centre Nitra, Slovak Republic
Prof. Dr. Peter Chrenek

PARTNER 1: Uniwersytet Technologiczno-Przyrodniczy im. J.J. Sniadeckich w Bydgoszczy, Faculty of Animal Biotechnology, Poland
Prof. Dr. hab. Marek Bednarczyk

PARTNER 2: Università degli Studi del Molise, Campobasso, Department of Animal, Plant and Environment Science, Italy
Prof. Dr. Giuseppe Maiorano

Scientific referee: prof. Ing. Jozef Bulla, DrSc., SAU Nitra, Slovakia
Ing. Alexander Makarevich, DrSc., APRC Nitra, Slovakia

Erasmus project "Biotechnology and quality of animal products" will allow students to explain further an issue of the application of the most recent biotechnological methods in the genetic engineering (chimera production, sperm separation, cryopreservation,...) due to the specific lectures and practical demonstrations in specialized laboratories.

The absolvents of this intensive program will have skill in analytical evaluation of the animal products (poultry) with the use of the modern technology. Furthermore, we will put emphasis not only on the classical methods of the animal products quality evaluation.

The course realize in the university of Bydgoszcz, Poland (February 2013) has a strong European dimension, having teacher and student participation of several European countries.
