

### AUTHOR INFORMATION PACK

**P-ISSN 1337-9984**

**E-ISSN 1338-0095**

**Slovak Journal of Animal Science (SJAS)** is an open access international peer-reviewed scientific journal published by the National Agricultural and Food Centre – Research Institute for Animal Production Nitra.

**Periodicity:** 4x per year (March, June, October, December)

Papers are published under Creative Commons BY-NC 4.0 International Licence.

**Abbreviation:** *Slovak J. Anim. Sci.*

**Publisher** National Agricultural and Food Centre – Research Institute for Animal Production Nitra, Slovakia

**Slovak Journal of Animal Science** is an open access serial publication focused on multidisciplinary based research approaches to animal & veterinary sciences. Sections: Animal Biotechnology, Animal Husbandry, Animal Nutrition, Animal Product Quality, Animal Environment and Behaviour.

### Editorial Team

#### Editorial Board

- Editor in Chief:

**Peter Chrenek**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

- Vice-Editor in Chief:

**Alexander V. Makarevich**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

- Executive editor:

**Timea Sommerová**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

- Technical editor:

**Marta Vargová**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

#### Board :: Section Animal Biotechnology

**Miroslav Bauer**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Marcela Capcarová**, Slovak University of Agriculture Nitra, Slovak Republic

**Dušan Fabian**, Institute of Animal Physiology of the Slovak Academy of Sciences, Košice, Slovak Republic

**Elena Kubovičová**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Peter Massanyi**, Slovak University of Agriculture Nitra, Slovak Republic

**Joanna Pokorska**, University of Agriculture in Krakow, Poland

**Pavel Uhrín**, Medical University of Vienna, Austria

**Board :: Section Animal Husbandry**

**Jiří Bezdíček**, Palacký University Olomouc, Olomouc, Czech Republic

**Jarosław Olav Horbańczuk**, Institute of Genetics and Animal Breeding of the Polish Academy of Sciences, Jastrzębiec, Poland

**Radovan Kasarda**, Slovak University of Agriculture Nitra, Slovak Republic

**Marta Oravcová**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Dana Peškovičová**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Ján Rafay**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Vladimír Tančín**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Board :: Section Animal Nutrition**

**Mária Chrenková**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Branislav Gálik**, Slovak University of Agriculture Nitra, Slovak Republic

**Oldřich Látal**, Agrovýzkum Rapotín s.r.o., Vikýřovice, Czech Republic

**Matúš Rajský**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Milan Šimko**, Slovak University of Agriculture Nitra, Slovak Republic

**Eva Straková**, University of Veterinary and Pharmaceutical Sciences Brno, Czech Republic

**Rudolf Žitňan**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Board :: Section Animal Product Quality**

**Juraj Čuboň**, Slovak University of Agriculture Nitra, Slovak Republic

**Viera Ducková**, Slovak University of Agriculture Nitra, Slovak Republic

**Miroslav Kročko**, Slovak University of Agriculture Nitra, Slovak Republic

**Giuseppe Maiorano**, University of Molise, Italy

**Peter Popelka**, University of Veterinary Medicine in Kosice, Slovak Republic

**Board :: Section Animal Environment and Behaviour**

**Krzysztof Adamczyk**, University of Agriculture in Krakow, Poland

**Boris Bilčík**, Centre of Biosciences of the Slovak Academy of Sciences, Bratislava, Slovak Republic

**Jan Brouček**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Ľubomír Ondruška**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

**Jaroslav Slamečka**, NPPC - Research Institute for Animal Production Nitra, Slovak Republic

Scientific English Editor: **Alexander V. Makarevich**

**Licenses & Rights**

All papers accepted for publishing in the SJAS are published under a CC-BY-NC licence (CC-BY 4.0). Published content can be shared (copy and redistribute the material in any medium or format) and adapted (remix, transform, and build upon the material for any purpose) excluding commercial use, with specifying the author(s).

Licensed under a Creative Commons Attribution-NonCommercial 4.0 International License

Authors have rights to reuse their work in compliance to ethical principles.

## Privacy Statemets

Slovak Journal of Animal Science and the journal's editorial process seek to be compliant with the [European Union's General Data Protection Regulation \(GDPR\)](#) and its provision for "data subject rights" that include:

- right to a "breach notification" when data is compromised
- "right to access" to the information about the processing of a subject's data
- "right to be forgotten" in balance with public interest in the availability of the data
- "data portability"
- "privacy by design"

Data collected from users of this journal falls within the scope of the standard functioning of a peer-reviewed journal. It includes information necessary for communication during the editorial process, information used to inform readers about the authorship and editing of content, as well as for tracking geopolitical and social elements of scholarly communication.

The data is used by the editorial team to the extent necessary for publishing and improving this journal and to help maintain the integrity and public record of scholarly publishing. The data will not be sold by this journal or its publisher and it will not be used for purposes other than those provided in this Privacy Statement. The authors published in this journal are responsible for the human subject data that figures in the research.

## Types of Article

SJAS publishes peer-reviewed articles as follows:

- **Original papers**
- **Review articles**
- **Short communications**

**Original papers** – original scientific papers which have not been published yet, should not exceed 8 000 words (including tables and illustrations).

**Review articles** – focusing on special topics of interest and summarising latest scientific information, up to 10 000 words (including tables and illustrations). Contributions of authors with experimental experience and publications on the given topic are highly preferred.

**Short communications** – these may be of a preliminary nature but sufficient for immediate publication, up to 2 500 words (including tables and illustrations).

## Before Beginning

### Pulishing Ethics

Publishing ethic principles are based on the guidelines and standards developed and published by the Committee on Publication Ethics (COPE) (<http://publicationethics.org/>).

---

### Care of Use Animals

If the work involves the use of animals, the author should ensure that the work described has been carried out in accordance with the **ARRIVE Guidelines**, which were developed in consultation with the scientific community as part of an NC3Rs initiative to improve the standard of reporting on research using animals (<https://www.nc3rs.org.uk/arrive-guidelines>).

### Originality

The author is responsible for the originality of the paper, the subject-matter and the formal attributes of the paper. Papers are published in the English language. The author is responsible for translation into English. In case of linguistic shortcomings the paper will be sent back to the author.

---

### Article/Manuscript Submission

**Manuscripts** should be sent by e-mail as attachments. Alternatively, they can be submitted on optical media or USB Flash disc with identical contents, including figures. Unique MS Word file must be saved under the first author's surname only. They are to be sent to the address:

Slovak Journal of Animal Science, Editorial Office Research Institute for Animal Production Nitra, Hlohovecká 2, 951 41 Lužianky, Slovak Republic. E-mail: [editor@vuzv.sk](mailto:editor@vuzv.sk). Phone: +421 37 6546 249. Fax: +421 37 6546 311.

**The author's declaration** (<http://www.vuzv.sk/slju/Declaration.pdf>) that the paper has not been published anywhere else should be enclosed. The Declaration must be carefully completed and signed by the first author.

**The Corresponding Author** should include his or her full name including all academic, scientific and pedagogic titles and the detailed address of the institution with postal code, telephone and fax numbers, and e-mail address.

---

### Review Process

#### Reviewers' evaluation

All scientific contributions will be peer-reviewed on the criteria of originality and quality. Two reviewers with appropriate knowledge of the subject are appointed for each paper. If need be, a third reviewer will be asked. The reviewers are asked to return papers within 3 weeks. Editorial board of the journal decides on contributing publications, taking into consideration the standpoint of reviewers, scientific significance and quality of manuscript. The manuscript can be rejected if it does not comply with the subject of the journal. The editor makes every effort to explain to authors the reasons of rejection.

#### After reviewers' evaluation

After the author receives the reviewers' opinion, he owes to return the corrected manuscript to the editorial office within three weeks. The authors may, however, request an extension of the re-submission deadline if necessary. After incorporation of revisions it is necessary to send the new complete manuscript with tables and figures, also in case of minor revisions in the original manuscript. Enclosed in an attachment, the author has to answer all the important comments of the reviewers clearly and in detail. The author is not obliged to respect the comments of the reviewers but he has to explain in the enclosure why he does not accept the reviewers' comments. If the

author does not meet the deadline or other conditions of sending back the revised manuscript, his paper is liable to be excluded from further processing.

### **Sending the corrected proof**

The author has to return the made-up manuscript for proof-reading. He must send it back within two days. Within this stage of manuscript preparation for printing, corrections are done only for such errors that arise during the work in the editorial office.

## **Article/Manuscript Structure**

### **Title**

The title should briefly but accurately characterize the aim of the paper. It is not advisable to use any abbreviation in the title.

### **Author(s)**

Names of authors should be without titles, in capital letters; full first name SURNAME. Individual authors separated by comma: e.g. Jan RAFAY, Katarína BEZOVA, Pavel FLAK

### **Abstract**

The abstract should contain abbreviated exact subject of the paper without any added interpretation or criticism. It must (together with tables and figures that are published in the text, possibly with a reference to them) give the reader sufficient amount of information about the paper, namely about the objective, method and the most important results of the work (mentioned are statistical and numeric results). The abstract must not exceed 350 words.

### **KEY WORDS**

Keywords are arranged from more general terms towards more precise ones. They begin with small letter and are separated by semicolon. They should contain from 3 to 6 words.

### **INTRODUCTION – Heading**

The introduction shall give brief and clear information about the current state of the research in the given field in our country and abroad (references of authors) and about the objective of the work with an explanation of scientific or social necessity to solve it. Quotation should serve as connection of the quoted place with the References. In the scientific journal Slovak J.Anim.Sci. the “method of utilization of the first entry and date” is used for quotation in agreement with the norms. Names of authors are written with small letters in brackets (e.g. Novak, 1999). It is recommended to include references to papers from peer-reviewed periodicals only. Citations from non-available sources (reports, national journals, proceedings, etc.) should be omitted. Papers published by one or two authors are to be cited by their names, those published by three or more authors by the name of the first one, et al. If more than one paper by the same author/two authors/first author, et al., published in the same year is cited, they should be differentiated by YEAR<sub>a,b,c</sub> both in the text and the list of References. Citation in text: e.g.: ..... Clark and Davis (1980), ..... Citation within brackets: In case of more than one cited author in one paper, only the first author and *et al.* are referred, e.g.: .... (Tesařík *et al.*, 1986) ..... If the same problem is solved by several authors in separate works, then they are separated by semicolon, e.g.: (Blaho *et al.*, 1980; Davis, 1990; Hyttel *et al.*, 2000). Several

papers cited together should be arranged according to the year of publication starting with the oldest one.

### **MATERIAL AND METHODS** – Heading

Should describe the studied material as well as used methods of study and ways of evaluation of results as precisely as possible. The used method of experiment is described only in case of original or modified method, or with quotation of author of the method. The description of method should enable the interested specialist to repeat the work. Statistical methods must be described in details including the software used.

### **RESULTS** – Heading

In this part, only the concrete results of work are mentioned; the most important numerical values and data mentioned in tables should also be presented in the text. Only significant differences should be commented. It is necessary to support the results by variation-statistical processing. Statistical evaluation of results must be logically explained and perfectly processed. Results should contain data that make it possible to verify them (e.g. with evaluation of significance of differences in two averages, it is necessary to give the average, number of determinations and standard deviation). Statistically significant differences must be unambiguously and clearly marked in tables or graphs.

### **DISCUSSION** – Heading

It is necessary to assess results from various aspects mainly with respect to factors that could influence them, and to confront them with results of other authors in such a way as to show what is new in the obtained results and what differs them from results of other authors or hitherto knowledge or in which part they correspond to each other. Bibliographical reference of authors should be in the same form as in the introductory part.

**RESULTS AND DISCUSSION** may comprise one chapter.

### **CONCLUSION** – Heading

Conclusion has to be clear and brief. It should define clearly the obtained new knowledge, the most important results, their scientific or practical significance and recommendations for the practice or for further research.

### **ACKNOWLEDGEMENT** (If applicable)

At the end of the paper mention the number and title of project within which the problem was studied and the published results obtained.

### **REFERENCES** – Heading

Bibliographical reference – set of data enabling identification of document (both primary and secondary sources) that is connected in some way with creation of another document. If author used secondary sources in article, the references will be refer to the sources where the information were found, not the original source.

References are set out in the alphabetical order of the first elements, with the year of publication (author/first element and date method). References (reference list) should include the details of all in-text citations. Each source is listed alphabetically A-Z by first element (first author surname/corporate author/title of anonymous document ) and then further sorted chronologically, if necessary. Listed are only sources that are quoted in the text.

Slovak Journal of Animal Science encourages to cite research data sets/datasets in the manuscript text and to include data reference in references. Rules for dataset citing are described below.

Selected literary sources should be directly connected to the problems dealt with in the paper and they should consist only of peer-reviewed scientific journals. Listed should be only primary sources, based on results of the quoted authors.

Bibliographic references and quotations shall be written according to the **APA style**. References in the text should agree with those in the list of references.

### Article/Manuscript Format

#### Main text

The manuscript should be delivered in text editor Microsoft Office (Word, Excel) for Windows. The text should be in non-formatted style (unjustified). It is necessary to number all the lines in the text as well as the pages.

If any abbreviations are used in the paper, they must be appropriately explained when they are used in the text for the first time. It is not advisable to use any abbreviation in the title of the paper or in the abstract.

Scientific names or Latin words are to be written *in italics*.

For units, follow the internationally accepted rules and conventions: use the international system of units (SI). If other units are mentioned, please give their equivalent in SI.

In case of mathematical formulae please submit math equations as editable text and not as images. Present simple formulae in line with normal text. Variables are to be presented in italics. Number consecutively any equations that have to be displayed separately from the text

Tables and figures (photographs, graphs and other images) should not comprise a part of the text – approximate place is marked within the text where they should be placed as follows: one empty line, then the table No. should be written, followed by an empty line and then the text. They are to be submitted on separate pages appended to the article. Each table or illustration has a caption. Table: above, figure: below. All figures (photographs, graphs and drawings) to be indicated as figures (Fig.).

---

Words should not be divided; between words just one stroke should be left; no style, macro should be adjusted; should be written only as basic text, no decrease or increase in the font size is admissible, indices should be written with upper index and lower index; only 'enter' should be used to end the paragraph.

**Headings / Level of heading**

(centered, left, intended :: uppercase, lowercase; :: boldface, normal, italicized, ...)

**Tables**

Tables should be prepared as editable text and not as images. Font type: Times New Roman, font size: 9; simple spacing; well-arranged and as simple as possible, typed in format – *Table : Insert* (each entry has to be done in separate cells); width 16.4 cm x height 23 cm = one page per table (maximum size inclusive of title and explanatory notes below the table); Arabic numerals are to be used for marking the tables (e.g. Table 1: ...); no vertical lines should be used; significance of differences is marked in the same line as numbers, not as an index (e.g. 0.55++ or 0.55ab); in description of the tables abbreviations should not be used; SI units have to be used.

**Figures***Graphs*

Graphs should be inserted as an image; simple and well-arranged, without shadowy outline and background, and without grid, of width 16.4 x height 23 cm = one page per graph (maximum size of graph together with all explanatory notes below the graph); charts in MS Excel format (xls) will be accepted when submitted with their underlying table data.

*Photographs and other images*

Format tiff, gif, jpg, psd, eps – in CMYK; resolution min. 300 dpi; they are published black and white for the present, the author must expect the coloured photograph to be published in degrees of grey colour (on [www.vuzv.sk](http://www.vuzv.sk) are photographs in colour); width 16.4 x height 23 cm = one page per figure (maximum size inclusive of title and explanatory notes); photographs and figures including written text has to be in group format; photographs, graphs and drawings to be indicated as figures (Fig. 1: ... etc).
